

Dinusara Wijewardana

ELECTRONIC & TELECOMMUNICATION ENGINEERING UNDERGRADUATE

071 234 5678 | Dinusara@gmail.com | Sri Lanka

PROFILE

Electronic & Telecommunication Engineering undergraduate at General Sir John Kotelawala Defence University (KDU), with hands-on experience building Arduino- and ESP32-based embedded systems and a solid grounding in digital communication, signal processing, and electronics. Pairs technical project work with proven leadership — running large-scale university events and coordinating engineering societies end-to-end. A fast learner who is comfortable owning a problem from requirements through to a working, tested build, looking to bring that mix of technical depth and coordination to a telecommunication engineering internship.

EDUCATION

BSc (Hons) in Electronic & Telecommunication Engineering

Intake 42 · In Progress

General Sir John Kotelawala Defence University (KDU)

GCE Advanced Level (A/L): Physics – A · Combined Mathematics – B · Chemistry – B

GCE Ordinary Level (O/L): 8A, 1B

TECHNICAL SKILLS

Programming	C, C++, Embedded C, Arduino, Python (basic)
Embedded Systems	ESP32, Arduino Uno, GPIO, PWM, UART, I ² C, SPI, Sensor Integration
Telecom & Electronics	Digital Communication, Signal Processing, Communication Networks, Wireless Fundamentals, Circuit Analysis
Engineering Software	Arduino IDE, MATLAB, Proteus, SolidWorks, MS Office

ENGINEERING PROJECTS

Autonomous Line-Following Robot

- Designed and built an autonomous line-following robot on Arduino, using IR sensors for path detection and custom motor-control logic for accurate navigation.
- Owned the full build cycle — hardware integration, debugging, testing, and optimization.

Stack: Arduino · Embedded C · IR Sensors · DC Motors

Multi-Task Robotic Vehicle

In progress

- Building a multi-task robotic vehicle on ESP32, integrating multiple sensors and motor drivers into a single modular system.
- Structuring the embedded software for scalability and easier maintenance, with ongoing debugging and performance tuning.

Stack: ESP32 · Arduino IDE · Embedded C

Pet Robots

Individual Design Project · Semester 4

- Designed and built a pet robot as the Individual Design Project (IDP) for 4th-semester coursework at KDU.

LEADERSHIP & CAMPUS INVOLVEMENT

Head, Program Team

IEEE Communications Society (ComSoc)

Led planning and execution of technical programs and student events, coordinating volunteers and logistics across organizing committees.

Supervisor, Design Team

Institute of Engineering & Technology (IET)

Supervised student design activities and coordinated design teams for technical events, workshops, and seminars.

Project Co-Chair

ERIC Student Society

Coordinated student projects and technical activities, managing scheduling and team logistics from planning through execution.

Student Representative

ET Engineering, Intake 42 — KDU

Acted as the liaison between academic staff and students for lecture schedules, lab sessions, and examination information.

VOLUNTEERING

- KDU Career Fair 2025, IGNITE 2026, and the Vice Chancellor's & Dean's List Award Ceremony 2026 — supported event coordination, registration, logistics, and participant management for several of the university's largest annual events.
- Regular volunteer at technical workshops and seminars run by IEEE ComSoc, IET, and the ERIC Student Society.

CERTIFICATIONS

- CCNA (Cisco Certified Network Associate) — Cisco Networking Academy, in progress

ADDITIONAL INFORMATION

Languages	Core Competencies	Interests
Sinhala (Native)	Leadership, Project Coordination, Event	5G & Wireless, IoT, Robotics, Automation,
English (Professional)	Management, Teamwork, Analytical	AI
	Thinking, Adaptability
